

Verification Statement

13 December 2018

Mr. Atsuhiro Mukoyama
Director
F.C.C. Co., Ltd

Objective

SGS Japan Inc. (hereinafter referred to as "SGS") was commissioned by F.C.C. Group (hereinafter referred to as "the Organization") to conduct independent verification based on Criteria of Verification (ISO14064-3: 2006 and the SGS verification protocol) regarding the data prepared by the Organization on the scope of verification (hereinafter referred to as "the GHG assertion"). The objective of this verification is to confirm that the GHG assertion in the Organization's applicable scope has been correctly calculated and reported in the GHG assertion in conformance with the criteria, and to express our views as a third party.

Scope

The scope of verification is limited to Scope 1 and 2: energy-related CO₂ emissions and energy consumption at the head office, R&D Division, manufacturing technology center, 5 domestic production sites, 3 domestic affiliated companies, and the 7 major overseas affiliated companies which have been defined by the Organization (18 sites in total), and Scope 3 (Category 7) for the entire Organization. The period subject to report is from 1 April 2017 to 31 March 2018.

Procedure of Verification

The GHG assertion was verified in accordance with Criteria of Verification, and the following processes were implemented at a limited level of assurance:

- Verification of the calculation system: interviews on the measurement, tabulation, calculation and reporting methods employed by the Organization as well as review of related documents and records
- Verification of the GHG assertion: On-site verification and review of vouchers conducted at the Suzuka Factory and the Hamakita Factory, and analytical procedures and interviews for other sites in the scope of verification carried out at the head office.
- The criteria for this review are based on the Act on the Rational Use of Energy, Basic Guidelines on Accounting for Greenhouse Gas Emissions throughout the Supply Chain, Ver. 2.3, the Database of emissions unit values on the same Accounting Ver. 2.5, and the Protocol specified by the Organizations.

Conclusion

Within the scope of the verification activities employing the methodologies mentioned above, nothing has come to our attention that caused us to believe that the Organization's GHG assertion (Scope 1: 26,227t-CO₂, Scope 2: 89,809t-CO₂, Scope 3: 4,075t-CO₂) was not calculated and reported in conformance with the criteria.

SGS Japan Inc. affirms our independence from the organization, being free from bias and conflicts of interest with the Organization.
